Generative Al Journey

2023-2024

Seeking value

79% of respondents expect generative AI to transform their organisations within three years. But in practice, they are most focused on gaining practical benefits today.

2024-2025

Looking to transform

Given their focus on efficiency, how will business leaders achieve more innovative and transformative outcomes?

Generative Al Journey

The winners of AI will be those who know how to use AI and have private data.

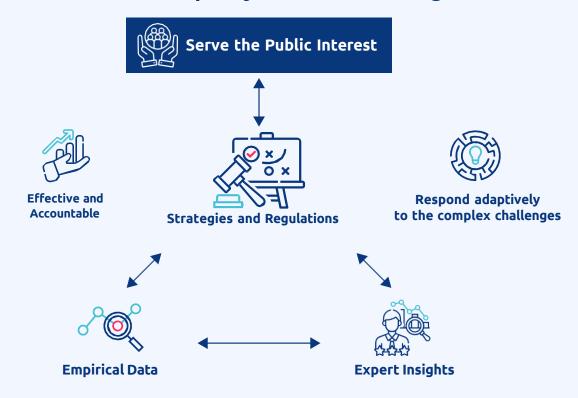

Cathie Wood

Trusted Data & AI + Human = AI Winners

Public Sector Ambitions

Public Sector Organisations depend on knowledge as a resource for evidence-based policy & decision-making

The Challenges in Public Sector

Data silos & complexity Ethical & Privacy Legacy technologies

It's getting harder

Volume too great
Too busy
Changing workplace
demographics

It's no longer manageable by "domain experts"

Digital archaeology, digging back through time. Hundreds of hours spent by scientists in finding information.

Poor decision making due to lack of knowledge, or insight from the past research.

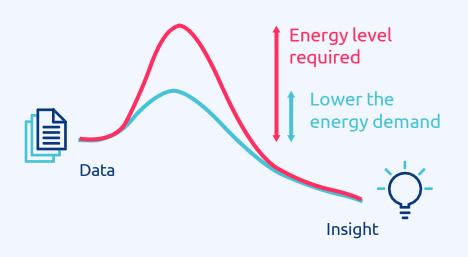

No time to drive innovation leading to missed opportunities.

The solutions to Public Sector challenges

Digital archaeology

Better Decision Making

Drive Innovation
